Dear Mr. Ghallager:

This letter is to inform you about the tremendous results we are having with the use of your product Ultraseal. We began using this product on off road and on road vehicles a couple of years ago and began to see immediate savings in our cost of repairs to flat tires. Not even once have we had a flat tire on one which we treated with this product. The most amazing results were proven just last week when we removed a $\frac{1}{2}$ inch diameter bolt from a truck tire and this hole was sealed within a matter of minutes and not lost any air since. We are also noticing extended wear on the tread of our tires. This product has been most valuable in helping us reduce our cost at a time when our budget is being stretched to the limits by decreasing revenues.

Let me say again, thank you for introducing us to this product. We are glad you did.

Thanks again,

David L. Skornicka
Superintendent of Public Works
City of Mt. Morris
