Flint, MI 48507

Dear Mr. Gallagher,

In review of our experience with your fine product Ultraseal. We have installed it in the following heavy duty construction equipment.

June 15, 1988	Caterpillar 966E Loader 2 older 23.50 x 25 tires
August 8, 1988	Komatsu WA-300 Loader 2 new 20.5 R-25 Michelin tires
August 8, 1988	670 New Holland Loader/Backhoe 2 older 12.00 x 16.5 tires
August 15, 1988	Champion D-740 Grader 2 older 17.5 x 25 older tires

We had costly and agonizing slow leaks in each of these tires. Tire repair crews were unsuccessful in eliminating the problem. Ultraseal did what you said it would do, it stopped the leaks.

In addition on June 16, 1988, I pulled a 1/4" nail out of a 750-15 tube tire on our GMC 1-ton truck. I installed 15 ozs. of Ultraseal and astonishingly the tire has not lost any air up to now.

Thanks again for introducing Genesee-Bay to your fine product line.

Sincerely

Dick Frammolino
