June 11, 1993

Ron:

More good news regarding Ultraseal and San Diego Gas & Electric. It has been almost a year running Ultraseal in over 60 vehicles at the S.D.G.&E. Kearny Mesa Yard. Together we have accomplished the following:

1. We do not have flats in tires using Ultraseal except for tires with large cuts in them. (Extreme road hazard cuts)
2. Air pressure has remained where we set it originaly.
3. We have dismounted tires with Ultraseal with no problems.
4. We have used the BANDAG retread process on many casings.
5. Guess what? Absolutely NO RUST on any wheels!
6. S.D.G.&E. has asked us to expand the use of Ultraseal in other yards as they feel we are out of the test stage.

We will be installing Ultraseal in the S.D.G.&E. Miramar Yard, Trucks, trailers, and forklift applications this month. I will keep you posted.

Regards:

Dave Smith
