Dear Sandra,

This letter is to state how Transylvania County Solid Waste Department uses the Ultraseal product. We operate and transport solid waste for two landfills and six Collection Centers. We have heavy trucks that are continually in use. Your product has been instrumental in helping keep these vehicles in use and rolling. Our truck's tires are constantly picking up nails. Ultraseal helps to prevent having to change out the tires. The time spent by our shop mechanics changing tires is about 2 hours per tire. Your product has saved our trucks expensive downtime.

The time and money Ultraseal saves us is appreciated. Ultraseal is a very good product that does what it says it will.

Sincerely,

William Sagar,
Solid Waste Director

William McCall
Chief Mechanic
